

## **Behavioral Health Services Insurer links**

Members of the Maine State UB92 Committee have long recognized the many difficulties that the Maine provider community has in understanding the differences and intricacies associated with Payer specific Behavioral Health Service benefits, policies and billing instructions.

To support the Maine Provider need to obtain up to date coverage and billing information a list of Payer specific website links associated with Behavioral Health Services has been developed. . This list of Payers will provide website links to obtain insurer specific guidance relative to member benefits, authorizations, billing and coverage. Insurer website links will be added as information becomes available.

The benefit information found at the Payer websites will provide information dealing with financial, clinical and case management. Using these links should allow for access to the most current information published by the Insurer.
